DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the three wedge fingers; the threaded nut being notched; the shaft portion having a smaller diameter at the threaded end and a larger diameter at the other end and a tapered transition section; the support washer; four wedge fingers; greater than four wedge fingers; the camming nut featuring a number of flat sides; three bails; threaded nut that is notched; four bails; and greater than four bails must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will

be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-8, 18-27, 20, 34, and 35 are rejected under 35 U.S.C. 102(b) as being anticipated by Calandra Jr. et al #5,244,314. Calandra Jr. et al discloses a mine roof bolt and method, the mine roof bolt comprising a shaft portion having a threaded portion 20; a camming nut 18 “fixed” in a longitudinal location; and an expansion shell 30 having a threaded nut 28 with a plurality of wedge fingers/bails.

Allowable Subject Matter

4. Claims 9-17 and 28-33 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claims 36-42 are allowed.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
